

Request to load Parameter File–Brief Format

1. With the Data Feeder running, the (Lunar Mission) System/ System Administrator Requests the Data Feeder load a Parameter File
2. The System/System Administrator sends the name and location of the Parameter File to the Data Feeder
3. The Data Feeder Opens the Parameter File
4. The Data Feeder loads all the Mission Data Parameters into the Feeder
5. The Data Feeder periodically generates the Mission Data based on the Parameter File requirements
