

Initialize Rocket–Brief Format

1. Flight Director Enters the Mission Parameters File (See *Use Case 1 Initialize Launch*)
2. For each Stage, System Initializes the Stage (See *Use Case 1.1.1 Initialize Stage*)
3. System Initializes the Payload/Capsule (See *Use Case 1.1.2 Initialize Capsule*)
4. System finds the Rocket Parameters file name and location.
5. System goes the Rocket Parameters file location
6. System opens the Rocket Parameters file
7. System reads the Rocket Parameters file
8. System initializes the Rocket Data with the appropriate Rocket Data read in from the Rocket Parameters File
9. System queries **or** receives Initialization Status from each Stage (See *Use Case 1.1.1 Initialize Stage*)
10. System queries **or** receives Initialization Status from the Payload/Capsule (See *Use Case 1.1.2 Initialize Capsule*)
11. System returns Initialization Data to the Flight Director
